Abstract (en)

[origin: FR2772163A1] The invention concerns a device, in particular portable and personal, for time accounting and assigning it to precise tasks to which this time has been devoted. Said device comprises at least means (F9) for memorizing the tasks, means (F2, F8) for reading in the time parameters and their task-code(s) and associated client-account(s), and means for assigning said time parameters to the task(s) and client-account(s) and display the result (or cause it to be shown otherwise or transmitted). Preferably, said device comprises other means such as time measuring means (F8), means for transferring data to a computer (F4), data banks, and the like. The invention useful for instantaneous and cumulative recording, in real time, the time assigned to one or several tasks, by one or several persons, and for using the data for invoicing, management of industrial projects, management of human resources, and the like.
