Abstract (en)
[origin: EP1038470A2] The worktable has a height adjustable frame (2) with at least one electric motor drive (4) and a controller (7) operated via an input unit (8) switch panel (9). The input unit has a reader (11) for an electronic data medium that drives a timing element (16) for triggering the switch panel via a comparator stage (15) for an identifier stored on the data medium (12) or reads out the demand value stored on the data medium for frame adjustment.
