Abstract (en)

[origin: EP1038477A2] The pedestal (1) has a stand surface (3), a support surface (2), on which goods for display can be arranged, and side walls, connecting the two surfaces. At least one side wall (8) is convex, and at least one side wall (7) is concave. A line of intersection generated through a vertical section of a side wall is curved towards or away from a vertical column axis. An Independent claim is included for a retail display incorporating the pedestal.
