Abstract (en)

An image-projecting hollow container for a liquid producing a decorative effect and a method for projecting an image using the hollow container for a liquid which can project an image projection substance located at the bottom of the image-projecting container to the surface of contained liquid when the image-projecting container is filled with liquid, such as water, beverage or liquor, etc. are disclosed. A user can view the projected image of an object located at the bottom of said container at the surface of the contained liquid while the container is filled with liquid matter, in order to excite and intrigue the user. Moreover, by using a company logo as the projected object, an advertising effect can be achieved. <IMAGE>
