Abstract (en)

[origin: EP1038748A1] The operating device incorporates a lever (7) fastened to a control shaft (1), and with a joint (3) extending parallel to the shaft. The joint is located behind the shaft in direction of the wagon interior, and in a closed position of the side wall, its longitudinal axis is located horizontally below the longitudinal axis of the shaft. A closing/guide claw (2) is hinged to the joint. A steering rod positioned above the shaft and beside the claw, engages into the lower section of the claw.
