Abstract (en)

[origin: EP1038817A2] The method for feeding a web of paper or cardboard to an empty or partially filled drum (10) comprises first feeding a strip (3) of the web over the top of a carrier roll, then through the gap in a guide (8) towards a waste container (9). After the desired width of web has passed the drum is moved to form a nip with the carrier roll. The web is then cut and winding on to the drum is begun. An Independent claim is included for a winding machine for carrying out the process.
