Abstract (en)

[origin: WO0022970A1] The invention relates to a heatable base plate (1) which is configured in such a way that the item being treated cannot stick to it. Recesses (10) are provided in each area (2) of the plate (1) with which the item being treated comes into contact when placed thereon. These recesses (10) are filled with an antistick material (8) in such a way that the exposed surface (9) of the antistick material (8) in the indentation (10) lies practically level with the intermediate areas (4) of the plate surface (2) that extend between adjacent indentations (10).
