Abstract (en)

[origin: WO9933676A1] The invention relates to an air spring for transport vehicles comprising a vessel ("piston") (10) of rigid, pressure-resistant material, such as steel, and a bellows (9), fitted onto the vessel ("piston") (10), of e.g. nylon-reinforced rubber, being in pneumatic connection with the "piston" (10) and connected to a source of compressed air. The invention is characterised by the "piston" (10) being provided with an air shut-off valve (13) in the opening (12) towards the bellows (9).
