Abstract (en)

[origin: US5970896A] To sew presewn flaps (P) on a fabric part (W), the flap (P) is positioned in its later position of use in a movable fabric holder of a sewing unit, and it partially overlaps a pocket (T) to be sewn on the fabric part (W). After the workpiece parts (W, P, T) have been fed to the sewing machine, the flap (P) is first connected to the fabric part (W) by a seam (N1). The part of the flap (P) overlapping the pocket (T) is then folded over and the pocket (T) is then connected by a seam (N2) to the fabric part (W).
