Abstract (en)

[origin: WO9931449A1] The invention relates to a method and device for processing, especially drying, lacquers in a working area (10). The inventive method comprises the following steps: (a) preparing a closed working area (10) which is filled with air; (b) drying the air in the working area (10); and (c) depositing the lacquer on the surface which is to be lacquered. The inventive device comprises the corresponding structural configurations for carrying out the method.
