Abstract (en)

[origin: EP1040769A1] The front sole (11) of the ski boot (10) has, on the tread side between the metatarsal area (13) and the heel (12), has connectors (16-20) engaging with matching connecting elements (14) on a binding mounted on a ski or other snow glider. The sole- connectors are so positioned that the distance between them and the front sole-end (21) or front ski-boot support on the binding always the same, independently of the boot size and of the total length of the sole including heel
