Abstract (en)  
[origin: EP1040771A2] The parasol (1) has a bending device (10) in its stem to bend the upper section (3) including the canopy (6,7) with respect the stem (4) of the parasol. The bending device is arranged above a lift part (8) for opening and closing the parasol. Support struts (9) for the canopy are connected to the lift part, so that they can follow the bending movement of the covering (7).
