Abstract (en)  
[origin: EP1040872A1] The housing around the exit end of the milling tube (10) comprises two fixed, non-rotating, spaced apart side walls (18, 19) with a rotatable conveyor ring (20) in between. A screening region (23) is incorporated into the space between the mill tube exit opening(s) (17) and conveyor ring, in between the two side walls. An inlet opening for screening air and an exit opening (26) fo screening air and fine production fraction (29) are provided in at least one of the side walls.
