Abstract (en)  
[origin: EP1040899A2] Cutting press has a device for moving a strip across the direction of rotation. Cutting press has a press table (1) with a strip (2) rotated by two rollers (3, 4) arranged on both sides of the press. The foil (5) lies on the strip to feed sections by means of a cutting tool in the region of the table. The press has a device for moving strip across the direction of rotation.
