Abstract (en)

[origin: EP1041231A2] The unit consists of a stationary hinge section (12) and a moveable hinge section (18) which are connected by an axial pin (A releasably attached guide body( 22,22a) is attached to the stationary hinge section. The guide body has a guide track (24,26) the moveable hinge section. The guide body has an element for generating a hold on the stationary section which also provides a support surface (24) for both sections.
