Abstract (en)
[origin: DE19747318C1] The invention relates to a cleaning device (10) comprising a cleaning liquid tank (40) and a waste liquid tank (36) in addition to a pump (56) in fluid communication with the cleaning liquid tank (40) in order to spray a surface to be cleaned. The inventive device also comprises a suction unit (54) to absorb the atomized cleaning liquid and to convey it to the waste liquid tank (36). In order to make said device more service-friendly and to reduce noise, the pump (56) and the suction unit (54) are accommodated in a separate housing (52) which can be introduced into the framework (12) of the cleaning device (10) in the form of an insert.
