Abstract (en)
[origin: WO9856670A1] The present invention relates to a handle for containers enabling them to be hung up, e.g water or fodder pails for animals. The invention is characterized in that an arc-shaped or rectangular handle (1) is bent at an angle of at least 90 degrees at an intermediate section where, when hung up, the part (3) attached to the container/pail (2) is located substantially in or parallel with a plane through the upper edge of the container.
