Abstract (en)

[origin: WO0006467A1] The present invention relates to computer carrying cases comprising a molded peripheral frame (10) and access doors (11, 12). Each of the access doors comprise soft molded shells (13, 14) that protrudes outside the frame to define a computer carrying case with three compartments. Between a first and second compartment there is located a panel (15) having a sleeve (17) to receive and suspend a laptop computer (C) away from the interior of the frame.
