Abstract (en)

[origin: WO9933730A1] The invention relates to conveying means (1) which can be rail-guided and are provided for conveying especially flat products in a conveying direction (F). Said conveying means comprises a guiding part (2) which runs in a v-shaped manner in a conveying direction and constructs a three point support. In addition the conveying means comprises a supporting part (3) which is provided for holding the product and arranged in fixed manner on the guiding part (2). The conveying means also have a coupling part (4) which is arranged on a driving means (9) such that it can be coupled.
