Abstract (en)

[origin: WO0002373A2] A method and system for providing tariff information to a user in a communication network, comprising a downloading of the tariff information from the communication network to the user, such that the downloading of the tariff information takes place before the making of a regular call by the user. This gives the user tariff information about a telephone call he wants to make prior to the actual making of the call, so that he can plan the call in advance and plan and make it during a period of time telephone charges are at their lowest.
