Abstract (en)
[origin: DE19914087A1] Classifier comprises a dispersing and classifying unit (12) with a dispersing device (8) and a drum (11); a charging unit for introducing powdered material into the unit (12); an additional vessel (25) for the dispersing liquid and the suspension to be classified; a feeding and removal system between the additional vessel and the dispersing and classifying unit; a removal system for the removed coarse component from the dispersing and classifying unit; a storage vessel (31) for the classified suspension; and a removal system for the classified suspension from the dispersing and classifying unit to the storage vessel.

Abstract (de)
Es wird eine Anlage zum Naßklassieren von pulverförmigen Substanzen beschrieben. Die Anlage weist als Hauptbestandteile eine kombinierte Dispergier- und Klassiereinheit (12), einen Ansatzbehälter (25) und einen Speicherbehälter (31) auf. Sie hat daher besonders wenige Bestandteile und ermöglicht eine besonders kompakte Bauweise. <IMAGE>
