Abstract (en)  
[origin: EP1043457A2] The mast (1) has two cross-beams (3,4) for overhead cables (5). Each mast is cut off below the cross-beams and has a fitting part (2) of defined length enclosing a region of the free end of the mast like a sleeve. At least two cross-beams can be fitted to the fitting part at defined points. An Independent claim is also included for a method of repairing and raising a concrete mast.
