Abstract (en)
[origin: EP1043814A2] The device has a drive unit (3), a storage unit (4) containing several contact elements (1), a transport device for delivering contact elements to the cable ends (2) and a processing unit (5). At least the processing unit and the storage unit form a close assembly (6) that can be separated from the drive unit. The assembly can be at least partly inserted into a gap between the driv unit and a base plate.
