Abstract (en)

[origin: WO9923905A1] A storage/dispensing assembly, e.g., a roll or stack, of non-woven loop tape fastener material such as is used in hook and loop fastening system comprising one or more multilayer sheets of loop tape fastener material arranged such that the adhesive layer in the assembly of an overlying non-woven loop tape fastener material is in direct contact with the underlying loop layer of non-woven loop tape fastener material. The non-woven loop layer is formed at least in part of fibers having a denier of greater than 15 so as to decrease the level of fibers disengagement when an overlying loop tape fastener material is removed from the assembly.
