Abstract (en)

[origin: DE19850043A1] The invention relates to a device for cutting sheet material length-wise. Said device comprises a knife holder (2) which can be linked to a cutter bar (1). Said knife holder substantially consists of a support body (3) and a cutter head (4) which is provided with a circular cutting knife (5) and which can be adjusted vertically and horizontally in relation to the support body (3). Said knife holder is also provided with a connector (12) for connecting the support body (3) to the cutter head (4) and/or the cutter bar (1). The direction of connection extends in the plane of the circular cutting knife (5).
