Abstract (en)

[origin: DE19758178A1] The invention relates to shaped bodies containing builder substances, alkali supports, bleaching agents, enzymes and tensides. The inventive shaped bodies are highly effective, highly stable in storage, have a pleasant fragrance and a defined solubility profile. An area making up not more than 40 vol. % of the shaped body contains more than 80 wt. % of the total content of an active substance I contained in the shaped body with a constituent from the group of chlorine bleaching agents and a meltable constituent for checking solubility from the group of tensides, paraffins, micro waxes and higher molecular polyethylene glycols.
