Abstract (en)

[origin: EP0713660A1] The loaf shaped cosmetic container has a cylindrical body (2) open at one end. There is an axially movable cupola (9) inside the body which supports the product. A rotating operating part (5), having a gripping side wall, is mounted on the body opposite to its open end and connected to the cupola by a screw jack (10,11). The screw jack has a pitch between 4 and 20 mm. There are sealing lips (31,32) between the axially movable cupola and the body and the screw jack threads (11), in contact with the packaged product.
