Abstract (en)  
[origin: EP1045297A1] Coaxial release anchor (1) has first (12) and second (13) rest blades. Each blade is made from a single stone and engages in groove (14) machined in the anchor. Each blade stone rises above the level of the release anchor (1) so that it meshes in the teeth (8) of a second release wheel (3). The anchor itself is in the same plane as first release wheel (1).
