Abstract (en)
[origin: EP1045299A2] The invention provides a self-powered timepiece including a housing; a lenticular panel (4) mounted in the housing; a high-efficiency, battery-powered drive means (16) having a cam (28); time-indicating means movable by the drive means, and a lightweight indicia carrier (12) disposed inside the housing in close proximity to the panel, the carrier being displaceable by the cam in relation to the panel. <IMAGE>
