Abstract (en)  
[origin: EP1045493A2] The lamp holder has a lamp fitting (11) and an insulating holder (12) for the fitting that latches onto the fitting from the rear with spring-elastically deformable latching arrangements (13,14) on the holder and fitting and a twist-protection arrangement (15,16). The twist-protection arrangement on the holder side has at least one journal (18) decoupled from the elasticity of the holder that engages a journal holder (19) in the fitting when the holder and fitting are joined together.
