Abstract (en)
[origin: WO9935005A1] The invention relates to an apparatus for handling a container, such as transferring a container from a platform into a vehicle or from one vehicle to another, the apparatus comprising a pair of cranes (3, 4) provided with sets of booms, which comprise a base boom (6), a main boom (8) and a folding boom (10) and handling unit cylinders (12, 13), a main boom cylinder (12) and a folding boom cylinder (13), and support legs (20, 21) included in the apparatus. At least one of the cranes is placed on the chassis (7) of a vehicle (1) embedded in the cargo platform (2), so that, with the set of booms in a retracted, i.e. rest position, their upper sides are located in the same plane as the deck plane of the cargo platform (2).
