Abstract (en)
[origin: DE19850587A1] The invention relates to an internal combustion engine, especially for a motor vehicle, which is provided with a combustion chamber into which fuel can be injected in at least two different fuel injection modes. A control unit is provided for switching between the two modes. The control unit can also be used to switch to an intermediate mode (25) when switching between the two fuel injection modes (23, 24).
