Abstract (en)
[origin: DE19850586A1] The invention relates to an internal combustion engine, especially for a motor vehicle. Said internal combustion engine is provided with a combustion chamber into which fuel can be injected in at least two operating modes. The internal combustion engine is provided with a control unit which switches between the operating modes subject to a desired operating mode. Said control unit detects the desired operating mode from a plurality of operating mode requests.
