Abstract (en)

[origin: WO0028732A1] There can be obtained a medium on which a remote-control information is recorded and a portable electronic device serving as a remote control operation device for transferring the information. A portable electronic device is one that can be connected to a host machine (1) having a program executing function and that includes an input and output function and a processing function independent from the host machine (1). The portable electronic device (100) also includes means (46) for storing remote control operation information that has been transferred from a recording medium in the host machine (1), a control means (41) for executing remote control operation programs, and means (130) for displaying the remote control operation information in accordance with the remote control operation program. The remote control operation information is displayed in accordance with a hierarchical structure of operation.
