Abstract (en)  
[origin: EP1046357A1] The vaporization assembly comprises of a base assembly (3) within which is located an inverted pump assembly (15). Attached the base assembly is a reservoir assembly (1) that is attached to the pump inlet. A downward pressure on the reservoir causes fl to be vaporized by the pump assembly and out through an orifice (8). A decorative element (32) is located within the reservoir assembly.
