Abstract (en)

[origin: EP1046752A1] The ground anchor has one or more strands (2-4) which pass over a corresponding number of deflectors (6-8). Each deflector has two reinforcement irons (9a,9b,10a,10b,11a,11b) in a U-shape which disperse part of the forces into the environment and, at the time, act as side guides for the strands. The deflectors (6-8) are metal half-cylinders.
