Abstract (en)

[origin: EP1046963A1] Mechanism comprises a triangular balance lever (11) with two axles (14, 16) at two corners and a mounting tenon at the other. The balance lever interacts with a second element (20) that has a U shaped cut out with a base (22) and two arms (28, 32). One arm (34) has a cut out (34) that engages with an axle (16) of the lever so that when the button (4) is pushed in a click is felt.
