Abstract (en)
Device for selecting coins or tokens comprising an inlet (17) for coins or tokens , a microprocessor or a CPU, a discriminator for coins or tokens, all of it through a given run, to which are associated means for determining the glow of the coin or token which generate a signal which will be released to a microprocessor or a CPU, informing on the level of glow of said coin or token (10) and on the ground of preestablished parameters the coin or token will be acknowledged as of legal tender or authentic or as false. <IMAGE>
Includes an inlet (17) for coins or tokens, a microprocessor (9) or a CPU and a discriminator (5) for coins or tokens. The device is capable of determining the glow of the coin or token which generates a signal which will be released to a microprocessor or a CPU, indicating the level of glow of the coin or token and on the ground of pre-established parameters; the coin or token will be acknowledged as of legal tender or authentic or as false.
