Abstract (en)

[origin: DE19748067A1] The invention relates to a hair shaping device comprising a handle section (31) and a heating section with a preferably dome-shaped heating area for heating and reshaping hair, in addition to a cooling section (41) with a cooling area for cooling the hair thus reshaped. The temperature difference between the surface temperatures of the heating areas and the cooling areas is at least 80 kelvin and especially 100 kelvin. The invention also relates to a method for reshaping hair, especially using a hair shaping device with the above-mentioned characteristics.
