Abstract (en)

[origin: FR2773458A1] The vacuum cleaner tool has a base plate , and air circulation circuit (8) on which is mounted a removable dust tube (16). The tool has a cover made from a supple material which covers the upper face and the exterior edges of the base plate and which is designed to absorb bumps against objects in the cleaning environment. The cover (17) is designed so that it can be removed from the base plate of the vacuum cleaner tool.
