Abstract (en)
[origin: WO9936006A1] This invention is an improved disposable cervical cap (10) having a thin, form assuming flexible dome (12) with an integrally molded annular rim (18). The dome (12) comprises an apex portion (14) and a base portion (16), wherein the apex portion includes first and second sidewalls. The cervical cap (10) further includes a substantially rounded reservoir (20) integrally molded with the apex portion of the dome for storing excess fluids produced by a female.
