Abstract (en)

[origin: WO9934794A1] This invention relates to the treatment of diabetic dyslipidemia using tocotrienols. Specifically, this invention relates to the use of individual tocotrienols (such as P25 tocotrienol), mixtures of tocotrienols and mixtures of one or more tocotrienols with other substances (such as the TRF25 mixture). The methods of this invention are particularly well suited for treating diabetic dyslipidemia in Type 2 diabetic patients.
