Abstract (en)

[origin: DE19800779A1] The invention relates to a fuse holder (10) for a fuse-link (20) in which a fuse status indicator having a printed circuit board (25) and a glow lamp (26) is fitted. The necessary connecting lines (16, 17) are made of conductive plastic from the top and base contacts (22, 23) of the fuse-link (20) to the printed circuit board (25) of the status indicator. The conductive plastic is injected in channels which are provided therefor and are situated in the housing of the fuse holder (10).
