Abstract (en)

A connecting member 21 comprises a pipe 24 and a pair of connecting pins 22, 23. Heads 22a, 22b of the connecting pins are forcefully fitted in the pipe so that the pipe is expanded to form expanded portions 24a, 24b in the radial direction thereof. The expanded portions are pressed against inner walls of the connecting holes 28, 29 of links 26, 27 so that the connecting member is secured in the connecting holes 28, 29 of the links 26, 27. <IMAGE>
