Abstract (en)  
[origin: EP1048260A2] Vacuum cleaning apparatus with high filtering power comprising an outer housing operatively connected to air sucking, filtering and passage means, where said housing has a water collecting reservoir operatively connected to said sucked air passage means and to baffle means opposing said passage, so as to obtain a complete nebulization of at least a portion of the water into the sucked air, before the so obtained flow passes through said filtering means. <IMAGE>
