Abstract (en)

Mat (1) comprising a slab-shaped textile body (2), fixed to a base (3) made of a non-slip material, also comprising a projecting all-round reinforcing frame (4), which is integral with the base (3) because it is moulded over the latter. The inside edge (5) of the frame (4) is made with an all-round recess (6), into which the outside edge of the said slab-shaped body (2) is inserted. This inside edge (5) of the reinforcing frame (4) covers the outside edge of the said slab-shaped body (2) at an oblique angle and has a lower all-round grid part (9) that improves the adhesion of the reinforcing frame (4) to the base (3). <IMAGE>
