Abstract (en)

[origin: EP1048376A1] A casting aid dosing device, comprising a distributor channel (3) with outlet nozzles (4) and transporters for casting aid delivery over the width of a continuous casting mould, is new. A casting aid dosing device for a continuous casting mould comprises a distributor channel (3) which is located at the broa side of the mould and which has several outlet nozzles (4) terminating above the mould, a transport system in the distributor channel for constantly transporting casting aid to the outlet nozzles (4) and a transporter associated with each nozzle for transporting casting aid through a discharge opening of the nozzle into the mould.
