Abstract (en)

[origin: EP1048449A1] The press shaft door (2) has a guide consisting of two guide track units by which the feeder shaft door (4) is slid parallel with the plane of the press shaft door between closed and open positions. The feeder shaft door in an open position is completely inside the outer dimensions of the press shaft door. Each vertical end side of the feeder shaft door has at least one track following and guided by a guide track of the guide track unit.
