Abstract (en)

[origin: EP1048543A1] The bogie has a central (12) and two end (3) wheel sets arranged in a frame (2). Each wheel set has a drive unit. For a curv path, the end wheel sets turn outwards against the longitudinal direction of the frame. Each end wheel set is connected to the f at its drive unit with at least one inclined shaft (1). The central wheel set is connected to the frame with at least one longitudinal shaft parallel to the frame.
