Abstract (en)

[origin: EP1048787A2] The road surface repair or replacement method has an opening formed in the existing bituminous road surface, e.g. via a mate removal head (18), before inserting a bituminous element in the opening, which is spread out at its inner and/or outer periphery for matching the opening contour, with subsequent hardening of the bituminous element. Also included are Independent claims for the following: (a) an application of a road surface repair or replacement method for replacement or lifting of gas water, or hydrant acces shaft covers; (b) a device for repair or replacement of a bituminous road surface
